Sector role description library

Browse role descriptions for roles that are common in the NSW public sector.

This library contains role descriptions for roles that are common in the NSW public sector and are expected to be found in many agencies. They have been developed in consultation with the sector and are quality assured and designed to meet current needs and future directions.

Sector role descriptions are a practical resource that will save much of the work involved in developing role descriptions. They provide consistency, which will support employee mobility, create clarity around work expectations and enable more effective workforce planning.

Some essential information, such as the role dimensions, needs to be added to a sector role description to produce a complete role description. When using these sector role descriptions, please refer to the [sector role description guide](#) and the [sector role descriptions frequently asked questions](#).

Sector descriptions have been transferred to the new role description template. The content has remained the same for most of the role descriptions.

For further information, or to provide feedback on the sector role descriptions, please [contact us](#).

Access the sector role description library
